

# INTEGRASPEC<sup>®</sup>

"The User Friendly ICF"

## FEATURE PROJECT

**Project:** Dashnaw Residence

**Chazy, New York**

**Architect:** TRD Design

**Chazy, New York**

**Engineer:** Theodore Luck P.Eng.

**Plattsburgh, New York**

**Features:** 6500 ft<sup>2</sup> unique custom home with 6" IntegraSpec<sup>®</sup> wallsystem for the 8.5' foundation and 9' 1" upper level and garage. 40' indoor swimming pool, 8' deep built with 6" IntegraSpec<sup>®</sup>. Radiant floor heating system. Stucco exterior.

**Benefits:** Winters in the Northern Adirondack Mountains are notoriously severe. IntegraSpec<sup>®</sup> was chosen to battle these strong elements and provide a safe family haven. As shown above, this custom home needed an ICF with design flexibility suitable for varying wall heights, windows, doors, and an indoor pool! IntegraSpec<sup>®</sup>, combined with state of the art heat exchangers, provides total indoor air quality including moisture control.

*"As a long time builder with a background in architectural studies, I was looking for a product that could handle all of the unique design ideas I wanted for my family's new home. I was familiar with ICFs and found that IntegraSpec<sup>®</sup> was the ICF that answered all of my needs. IntegraSpec<sup>®</sup> was user friendly, produced virtually no waste, was competitively priced, and could be shipped at a lower price than block style ICFs. Our engineer was equally impressed and now recommends IntegraSpec<sup>®</sup> as much as my family and I do."*

*- Tom Dashnaw, M.Arch.*
