

INTEGRASPEC[®]

"The User Friendly ICF"

FEATURE PROJECT

Project: Kelly Residence

Orleans, Ontario

ICF Distributor / Installer: EMM Group

Ottawa, Ontario

Contractor: Keyland Development

Ottawa, Ontario

Features: IntegraSpec[®] wallsystem foundation and main floor, garage and cold storage.

Benefits: The homeowners understood the value of long term energy efficiency and were demanding an Insulated Concrete Form wallsystem. After shopping and comparing, they insisted on the experienced EMM Group and IntegraSpec[®] wallsystem. Special features that IntegraSpec[®] complimented were 10' finished ceiling heights in the lower and main floor levels, radiant floor heating, and an extremely low energy bill each month.

"Ottawa is famous for its very cold and windy winters. IntegraSpec[®] was shipped to site in manageable bundles, wrapped in white plastic that protected the material against ice buildup in the interlocking bubbles. We worked in arctic conditions with a combination of freezing rain and still completed the project on schedule within budget."

- Ernie Philippe
