

INTEGRASPEC[®]

"The User Friendly ICF"

FEATURE PROJECT

Project: Lum Residence Tampa, Florida
Architect: Conner and Associates Tampa, Florida
Engineer: Catalano Engineering Tampa, Florida
Contractor: List Developers Tampa, Florida

Features: 5200 sq² stucco exterior luxury home. 6" IntegraSpec[®] wallsystem two stories at 12' and 10' finished ceiling heights. Concrete block tidal surge foundation / pier walls.

Benefits: IntegraSpec[®] construction was fast and accurate with very little waste. The octagon shaped rooms were assembled and the concrete placed with ease. Mr. John Lum reports half of the energy expense of his neighbors and appreciates the security his family has in a hurricane prone area.

"IntegraSpec[®] is stucco friendly. The EPS substrate is protected from UV deterioration as IntegraSpec[®] is shipped in bundles protected with white plastic. Fast construction with little waste drives the best per square foot installed cost".

- Ernie Philippe, Certified Installer/Trainer
