

INTEGRASPEC®

"The User Friendly ICF"

FEATURE PROJECT

Project: Bishop Hamilton Montessori School **Ottawa, Ontario**
Architect: Edmundson Matthews Architects **Ottawa, Ontario**
Engineer: C.J. Fox Engineering **Ottawa, Ontario**
Contractor: M.P. Lundy Construction Ltd. **Ottawa, Ontario**
ICF Distributor/Contractor: E.M.M. Group **Ottawa, Ontario**

Features: 6' IntegraSpec Wallssystem 10' high walls on 4' frost wall foundation style slab on grade. 6800 sq.ft.

Benefits: This school was built through the winter months, as are most schools for a September opening. IntegraSpec was able to save the general contractor and school committee crucial dollars normally spent on "winter heating" associated with conventional construction. IntegraSpec's fast, accurate construction met the contractor's construction schedule regardless of cold temperatures and assured properly cured concrete within the inherent 2 panels of EPS. Lower operating costs will also save the school countless dollars with less maintenance and super energy efficiency.

"Our new school is quiet, energy efficient, functional, bright and cheerful. Our maintenance costs are very low compared to our other school. IntegraSpec is simply common sense construction."

- Elaine Hopkins, Principal
