NEWS RELEASE

Mr. Michel Philippe, President, IntegraSpec ICF is pleased to announce the opening of two new IntegraSpec ICF manufacturing facilities in Decatur, Alabama and McCarran, Nevada near Reno

"The increased demand for IntegraSpec ICF products in the South East has been steadily increasing over the past decade. Uncertain weather patterns combined with an increasing awareness of the benefits of Insulating Concrete Forms were dominating factors in our expansion decisions. *Expanded Foam Products Corp* (EFP) has provided an excellent opportunity for us at their Decatur Alabama location."

Decatur, Alabama is a United States Port. Container shipping into Mexico, Central America, South America, and the Caribbean from Decatur is very cost efficient, especially after considering that a 40' standard container can hold over 5,000 square feet of IntegraSpec finished wallspace.

Mr. Philippe is equally impressed with the opportunities presented with the new Reno, Nevada facility.

"Our Kansas City facility was our most western location. We opened up western North American markets effectively over the past eleven years of IntegraSpec ICF production. McCarran, Nevada now increases our competitiveness. The fire resistance and seismic resistance of our versatile IntegraSpec ICF product line, in an increasingly costly global fuel market, made this location an obvious location for our expansion plans. *ACH Foam Technologies* shared our vision of a successful western USA IntegraSpec ICF facility. The Western North American ICF business will include increased Institutional, Commercial, and Industrial business for IntegraSpec. Our patented, flippable/reversible, bi-directional independent panel design is a "Commercially" designed ICF that is also suited to all residential applications."

These two locations bring the total IntegraSpec ICF manufacturing facilities to six and are welcome additions to: Plymouth, Wisconsin; Kansas City, Kansas; Uxbridge, Massachusetts; and Canadian facilities.

IntegraSpec ICF has other facilities opening globally and looks forward to more of these exciting announcements.
